

Beyond Expectation

CHINA

Having a global network means that **ASSAB's support is within reach no matter where you are.**

## ASSAB China

ASSAB's position as an industry leader for the best-known brand in high-performing alloyed steels for tooling and industrial components has been further strengthened by our expansion of top-quality metallurgical and tooling services.

ASSAB China has its service centres located in all strategic industrial provinces. Our comprehensive inventory of tool and special steels, together with a full package of service capabilities provides our customers with engineering solutions from a single site. Supported by a fully computerised order management system, customer relationship management software and radio controlled vehicle fleet, our operations are structured to provide the shortest lead time possible so that our customers can meet the demands of the Automotive, White Goods and Electronic industry segments.

Our unique range of complementing services e.g.machining, heat treatment, etc; also includes tool design consultancy using STRACK Normalien tooling components, high quality coating e.g. PVD, laboratory and failure analysis. ASSAB China has the expertise and capabilities to provide you, our customer, with a "one stop" solution for all your steel and tooling needs.

Dongguan Service Centre

Shanghai Service Centre

## Products

ASSAB China provides a comprehensive product portfolio to meet the many diverse needs in the industry.

- Cold work applications — stamping, blanking & forming, fine blanking, PM compacting, car body dies, cold forging, shearing knife, PVD coatings
- Plastic mould applications — injection moulding, blow moulding, compression moulding
- Hot work applications — die-casting, forging, extrusion
- Components — industrial knives, recycling, cutting tool holders, screws for moulding machines

## Services

**Surface Machining** — We pre-machine the tool steel into the most suitable form for the toolmaker. This makes handling and preparation much simpler for the toolmaker and more importantly, saves delivery time and money.

**CNC Machining** — We have experienced CNC machining teams that can provide the machining services for the production of mould inserts, mould components, fixtures for end-product assembly and other services.

**Heat Treatment** — Our state-of-the-art vacuum furnaces provide the most appropriate heat treatment service to realise the quality of the steel and enhance the performance of the tool.

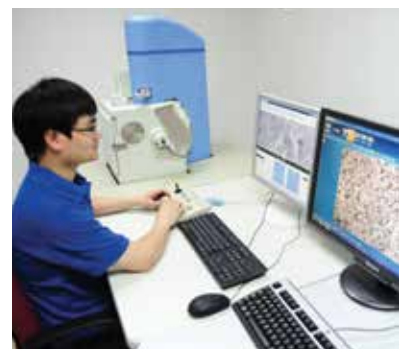

- Hardening and tempering
- Stress relieving
- Subzero treatment

### Surface Treatment

- Oxidising
- Nitriding
- ABP (ASSAB Benefit Process)
- PVD coating

### Other Services

- Repairing/welding services
- Laboratory services and failure analysis
- Technical consulting for steel selection
- Plastic tooling design with STRACK components

### List of Services in ASSAB China

<b>Stocks</b>	Plastic mould, cold work, hot work and PM steels for all types of tooling
<b>Delivery</b>	Daily delivery services
<b>Heat Treatment</b>	SCHMETZ/IPSEN vacuum furnaces (up to 15 bars), temper furnaces, NABERTHERM muffle furnaces, subzero equipment, nitriding furnaces, oxidising furnaces, ABP machines, welding machines
<b>Machining</b>	CNC machining centres, milling machines, grinding machines
<b>Bandsaw</b>	Vertical and Horizontal bandsaws
<b>Technical Support</b>	Fully qualified technical service for steel selection, tooling design, coating and laboratory services.
